

February 21, 2022

Dear Customer:

Wieland Metal Services sell products from suppliers that comply with the requirements of the following European Union regulations/directives:

- Restriction on the Use of Hazardous Substance (RoHS) Directive
- End of Life Vehicle (ELV) Directive
- Global Automotive Declarable Substance List (GADSL)
- Registration, Evaluation, Authorization, and Restriction of Chemical Substances (REACH)

Furthermore, these products do not contain any of the substances in the most recent Substances of Very High Concern (SVHC) list under the Registration, Evaluation, Authorization, and Restriction of Chemical Substances (REACH) Regulation. Wieland Metal Services has also determined that the strip products we sell are “articles” under REACH and therefore exempt from any registration requirement.

In addition to this, Wieland Metal Services participates in the International Material Data System (IMDS), a tool to aid in compliance with the ELV.

This representation applies only to products as they are sold by Wieland Metal Services. Each importer into the European Union should make its own determination as to whether products manufactured from or otherwise incorporating products sold by Wieland Metal Services continue to comply with these Directives and Regulations.

Sincerely,

Scott Faniola
Director Supply Chain
Wieland Metal Services
